$17.99

Siser Weeder

Allows you to weed quickly and accurately, even when cutting small details.

$14.99

Siser Squeegee

Squeegee helps to quickly and accurately lay down the masking tape without leaving air bubbles. Remove trapped air and create a bond between the mask and the image.

$1.49

Teflon Sheet

For heat pressed vinyl, lettering and transfer applications. If you only buy one cover sheet, make sure it's this one. A teflon cover sheet protects your garment and the upper platen. The teflon sheet is reusable and will give your image a semi-gloss finish. Size: 18" x 20"

$12

CAD Cut Heat Applied Textile Vinyl

EasyWeed by Siser

A ready-to-cut material designed for custom garment decoration. EasyWeed's pressure sensitive carrier allows you to weed small letters and fine designs easily. EasyWeed offers excellent durability. It's great for player names and numbers. Because of its thinness, it's extremely easy to cut, weed, and heat apply. Perfect for single color and multi-layered applications. Cut design in reverse. Heat Applications: Preheat garment to 302 F. Heat apply for 10-15 seconds, medium pressure. Peel Hot or Cold. Use on 100% Polyester, 100% Cotton, and all Poly/Cotton Blends.

WILFLEX CLASSIC WHITES

Bright Tiger - True bright white ink with a wide range of applications. Excellent opacity, fiber mat-down, low gloss level and good flash properties. Use as a stand alone white or an underbase.

Bright Tiger HV - Has the same properties as the regular Tiger, only it's thicker to provide a heavier deposit of ink for increased opacity.

White Buffalo - Extremely bright white ink with excellent opacity, fiber mat-down, low gloss level, & fast flash. Use as a stand alone white or underbase. Smooth and creamy with a soft hand.

Xtreme White - Smooth and creamy; it flashes fast and prints through fine mesh counts. Use as a first down underbase with flash or as a stand alone white. Good bleed resistance.

WILFLEX EPIC WHITES - PHTHALATE FREE

Performance White - Designed to print onto a variety of specialty fabrics, including performance athletic stretch polyester and polyester blended fabrics. Excellent stretch and bleed resistance. Low cure temperature helps prevent dye migration. Gel Temp: 220° Cure Temp: 290°

Polywhite - Specially formulated to combat dye migration problems on a variety of specialty substrates and synthetic fabrics. Gel Temp: 220° Cure Temp: 300°

Quick White - New premium ink great as an underbase or as a highlight white. Fast flashing with low tack and excellent fiber mat-down, leaving a smooth printing surface. High brightness and a matte finish. Use on 100% cotton or cotton/poly blends.

Wilflex EPIC Process Ink

Pure, transparent, high intensity colors designed for direct wet-on-wet printing.
Process colors have a soft hand, resist buildup, and minimize dot gain.
Substrates: 100% cotton, cotton blends, on white backgrounds.

Mesh: 305 to 355 Extender: Soft Hand Clear 10140PFX Tension: 25+ newtons
Reducer: Finesse 10150PFX Cure Temperature: 330 F Squeegee Type: triple 70/90/70 sharp edge

TIPS FOR BEST RESULTS WHEN PROCESS PRINTING
1) Select as fine a mesh as possible. 2) Keep mesh tension high - at least 25 newtons.
3) Use a sharp, triple durometer squeegee. 4) Use consistent pressure and squeegee angle.
5) Avoid unnecessary flashing.

EPIC MX Color Matching Ink

Wilflex EPIC MX color mixing system is specially formulated with non-phthalate plasticizers. It is an easy-to-use, easy-to-mix color mixing system with 15 intermixable colors that enables printers to produce PANTONE® simulations. EPIC MX inks are suitable for high production, wet-on-wet printing, offering a matte finish and excellent crock resistance. Colors will reproduce best on white or light substrates. For darker substrates use a low-bleed underbase white.

Custom Match PMS Plastisol Ink

Custom ink colors are mixed using the Wilflex PC color matching system. Simply select a color from the Pantone Color Formula Guide or send a color sample to Wild Side North. Allow 48 hours lead time.

Wilflex Base	QUART	GALLON
Mixing	$44	$ 96
*Performance	52	118

 * Designed to print onto a variety of specialty fabrics, including performance athletic stretch polyester and polyester blended fabrics. Excellent stretch and bleed resistance. Gel Temp: 220° F Cure Temp: 290° F

The Fine Print: PMS colors are designed for the offset printing industry and for inks to be printed on paper. The system is applied to plastisol inks and comes very close to matching PMS colors. However, since plastisol ink is basically different from offset ink, an exact PMS color match cannot be guaranteed in any plastisol ink matching system.

EPIC Performance Ink

EPIC Performance ink offers superb bleed resistance and great elasticity for printing on todays' specialty fabrics including 100% polyester, polyester blends, performance wear, and other "stretchy" fabrics. Prints wet-on-wet and gives a smooth surface and a matte finish.

EPIC Performance flashes at 220 and cures at 290; use mesh counts of 86-230.
EPIC Performance Underbase Gray flashes at 163 and cures at 290; use mesh counts of 86-140.

EPIC Heat Transfer Plastisol Ink

Wilflex Epic Transflex inks are used to create soft-feel, hot-split transfers that give the appearance of a direct print. Using the Wilflex IMS software and Epic PCs, users can easily create translucent or opaque colors by adjusting the pigment loading. Properly formulated colors will produce soft, opaque prints on dark fabrics, without underbasing. Epic Transflex inks may also be used for conventional cold-peel transfers. Mesh count: 86-123, Gel temp 250-270F, heat apply at 375F for 7-10 seconds.

Spec Black — This premium quality, smooth black ink is widely used on manual and auto printers.

Black Cream — The name says it all. New Black Cream has a super smooth body for easy printing.

Just So Soft Black — Formulated to mimic the soft hand of a water based print. This black has an intense color and is smooth and easy to print. Recommended mesh counts: 110-300.

Sun White — The 100% solution! Designed for great coverage on 100% cotton. Economical, opaque, fast-flashing, and easy printing.

Ultimate White — The New Standard! Creamy-Smooth! Ultimate sets the standard for a high-opacity, low bleed, super smooth, easy printing white.

Ultra Poly HO LB White — Designed for 100% polyester "performance fabrics" this ink offers the highest level of bleed resistance to combat dye migration. Has a creamy onsistency and a soft-hand. Flashes fast.

Titan Poly White — Offers the best bleed resistance and best opacity of all WMP white inks. Titan is super bright and fast flashing. Recommended mesh counts: 68-160.

W.M. Plastics Additives and Bases

	Item #	List QT	WSN QT	List GL	WSN GL	2 x 1GL	List 5G	WSN 5G	2 x 5G
Base-Softhand NB	100111	$24.03	$17	$42.48	$38	$36	$210.30	$175	$169
Just So Soft Base	101044	22.94	16	44.80	41	38	200.86	175	169

Reducer Curable	109906	24.04	17	43.37	39	37	182.24	165	158

Base-Softhand NB — A clear body base to extend colors used on light shirts.

Just So Soft Base — Softens the "hand" of any standard ink color. For best results mix 30% base to 70% pigmented ink.

Puff Additive — For a 3-dimensional look. Add to regular plastisol ink to make puff ink. Mix 10-15% by weight. Stir in thoroughly.

Reducer Curable — Reduces ink viscosity without affecting curability.

May assort WMP inks for quantity discount (per size)

W.M. Plastics High Opacity Ink

High Opacity Inks are for maximum opacity and wet-on-wet printing.
Higher pigment loading for ideal coverage on dark fabrics.

image mate

DZ 343
A diazo emulsion for Water-Based & Plastisol inks. 1000's of prints with no chemical hardeners and it still reclaims easily. Violet.

DC 521
A value priced, dual cure emulsion for textile and graphics shops. Low viscocity. Excellent leveling. Coats fast with no pinholes. Blue.

PC 701
Possibly the fastest exposing one-part SBQ emulsion. Super high 52% solids mean more build-up with fewer coats. Easy to reclaim. Pink.

Blockout Red 421
An inexpensive, water-based blocker of plastisol, UV, & solvent based inks. Spreads easily over every mesh count and dries fast.

TexTac
A water-based, pressure sensitive pallet adhesive for printing textiles. A single application holds hundreds of garments. 1 gallon = 4 cases of aerosols.

Chromaline Emulsion

Chroma/Tech PL

Pure Photopolymer emulsion. Designed exclusively for plastisol inks. Gives more buildup with fewer coats. Dries quickly and reclaims easily, with no lock-in. (Aqua)

Chroma/Tech PL2

Pure Photopolymer emulsion. For printing textiles with fine detail, halftones, and four-color process designs. Excellent coating on higher mesh counts. (Violet)

Magna/Cure UDC-2

Dual Cure Emulsion.
A Diazo & Photopolymer mix. Excellent for plastisol, UV and solvent based inks. Fast exposure and excellent definition. Medium viscosity. Good for all mesh. (Blue) *Also available in Clear

Magna/Cure UDC-HV

Dual Cure Emulsion. HV=high viscosity for easy coating on low or high mesh counts. Exposes fast with excellent image quality and superior mesh adhesion.
If you like RLX or TLX, you'll love UDC-HV! (Violet)

Ulano Chemicals

No.2 Micro Grit Fabric Abrader

An extreme fine powder to roughen mesh fabric for optimum adhesion of stencils to fabric. Use on damp fabric and wash off with cold water.

No.3 Screen Degreaser

Removes dirt, dust, and oils from all fabrics. Ready to use and needs no mixing. Degreases effectively in hard water and rinses clean with hot or cold water.

No.5 Stencil Remover Paste

A ready to use paste that removes direct emulsions and CDF films from all types of fabric. Thicker consistency stays where you put it. No odor and no strong akalis.

No.10 Extra Heavy Blockout

A heavy, water-soluble blockout for use with coarse mesh counts. Can be used for touch-ups when thinned with cold water. Recommended for all fabrics and all stencil systems.

No.23 Fabric Abrader & Degreaser

The abrading action promotes wetting of the fabric and adhesion of the stencil. Its degreasing action removes dust, dirt and oils from the fabric.

No.60 Screen Filler Liquid Blockout

Use full strength or dilute with water.

Fast drying, water soluble
for screen pinhole touchup.

Registration Guides

For locating flat stock and
transfer paper.
Reusable, tempered
stainless steel.
12 guides per pack.
$10.95
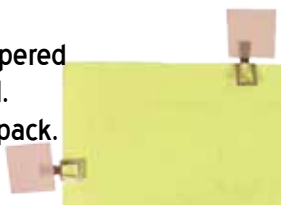

AWT Mesh and Halftone Determiner

Measures lines per inch
on art and threads per
inch on mesh.
$26.75
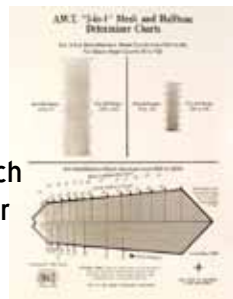

Screen "Kickstand" 6" Clamp

Holds screen in up position when doing
table top printing on flat stock. Spring
loaded action. Simply press on the frame
to lower it. 30" x 45" max screen size.
Use with hinge clamps shown at right.

$79.95

Hinge Clamps

For table top printing of flat stock.
Mounts with screws onto any surface.
Wing nuts secure clamp onto screen
frame. Great for oversize frames. Use
with "kickstand". CHC-100

$21.95/Pair

Solvent & Water Resistant Cloth Tape

A strong, white tape
with tight holding power.
Solvent and water resistant.
Easy to apply to inside and
outside of all frames to
seal and protect.
2" x 60 YD Roll

$22.25 / Roll

RhinoTech Hand Screen Stretcher

Model RSP 100-24 24" Bar, easy size
adjustment, soften corners easily, no
special tools or training, comes with
adhesive kit.

$170

Ergo-Force Squeegee Handles

The Do Everything Squeegee. Made of durable aluminum. Unique modular design allows two or more handles to be reconfigured into oversized lengths. Easy Clean design. Allows use of all four squeegee edges.

Breakthrough Grip Design

- **Less Fatigue**
- **Greater Control**
- **Increased Power**

The revolutionary Thumb Groove design combined with the two Hex Flat surfaces provide **Tremendous Gripping Power.**
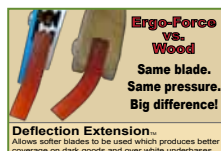

Ergo-Force vs. Wood
Same blade. Same pressure. Big difference!

Deflection Extension™
Allows softer blades to be used which produces better coverage on dark goods and over white underbases.

Easy Clean™ **design**
• Front surface is **smooth** and **flat** without screws, making it fast and easy to clean!
• Tough anodized finish resists chemicals.

Ergo-Force Squeegee

Size	Handle Only	* With Single Blade (60, 70 or 80A)	* With Triple Blade (60/90/60 or 70/90/70A)

16"	32.00	42.40	52.80
18"	36.00	47.70	59.40

* Handle/blade shipped unassembled.

Squeegees

Squeegee hardness is referred to as "durometer", with 60 being softer and 90 harder. Softer squeegees deliver more ink and harder squeegees deliver less ink and allow finer detail. Blade is available in single durometer and triple durometer which is a sandwich of 60 or 70 outside and 90 in the middle. Most textile printing is done with 70 durometer.

All handles are bolted (not glued) for easy blade replacement

Camie Aerosols

375 Flash Cure Adhesive

An adhesive that is designed for the screen print industry. It holds most all textile products. A clear mist spray made for the rapid heat cycles, like those in the flash cure process. 14 OZ.

380 Screen Printers Adhesive

380 is a pressure sensitive pallet adhesive that will not stain. It offers quick tack, has low soak-in and will not wrinkle textiles. It is great for making short-term bonds and releasing from textiles. 14 OZ.

385 Webbing Adhesive

A clear pressure-sensitive webbing adhesive that will not wrinkle the work while in use. Specifically designed for sweatshirts, fleece and other thick garments. 12 OZ.

480 Screen Opener

Works great for unclogging screens and loosens plastisol inks on screens. It works quickly, so as to cut back on down-time on screen printing. 15 OZ.

	WSN Can	WSN Case/12 (EA)

Pallet Adhesive

Tekbond TB-10

A water-based adhesive, for use with the TB500 Application system.

$ 39 GL
$177.50 5G

Tekbond TB-HV

A water-based pallet adhesive. Apply manually to pallet. Fast Tacking • Non-aerosol No V.O.C.'s • High Viscosity

$ 7   8 OZ
$18   QT
$54   GL

Tekmar TB-Orange Adhesive Remover

A safe and effective adhesive remover of pallet adhesives, grease, oil ink and grime from presses and screens.

$14 QT

NEW

Tekmar TB-EZ Performance Fabric Pallet Adhesive

The first pallet adhesive designed for use with the new polyster Performance Fabrics. High strength and will not lose tack during repeated flashing. Performance fabrics contain silicones and teflon additives that cause premature release with other adhesives. TB-EZ temporarily bonds with the fabrics fibers.

NEW
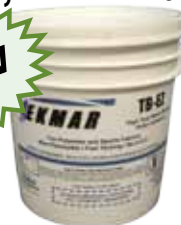

$44 GL

TexTac

A water-based, pressure sensitive pallet adhesive for printing textiles. A single application holds hundreds of garments. Apply manually or with Upol gun. 1 GL = 4 cases of aerosols.

$34 GL
$150 5G

• Squeeze bottle to apply thin bead of TBHV
• Follow with cleanup card to spread a thin, even coat over pallet.
• Optional: use flash cure unit to speed dry.

Sprayway Aerosols

382 Mist Adhesive
Perfect for textile screen printers. Will not transfer to fabric. The number one seller.

383 Web Adhesive
Ideal for sweatshirt & heavier fabric. Thicker spray stream. Will not transfer to fabric.

384 Flash Adhesive
An industrial grade spray adhesive with excellent heat resistance. Specially formulated for flash-curing.

40 Glass Cleaner
Keeps exposure table glass sparkling. Great for all glass products.

63 C-60 Degreaser
A solvent cleaner that removes grease, dirt and oil. Great for cleaning moving parts on presses. Leaves no residue and is fast drying.

92 Hi-Temp Heavy Duty Adhesive
A contact adhesive for use where high strength and heat resistance are needed. Great for gluing pallet sheeting.

201 Plastic Clear Fixative
A clear acrylic protective coating on artwork, proofs, and photos. Spray on ink-jet film to make positives waterproof.

208 Toner Aide
Improves opacity of laser printed positives. Darkens toner, 100% transparent. Dries in minutes.

211 Adhesive Activator
Spray on stretch & glue frames to speed drying of mesh adhesives.

945 Silicone Spray
Spray on shirt side of screen to prevent pick-up of ink when doing wet-on-wet printing.

957 Fast Open Screen Opener
Opens dried areas of screens. For use with all types of inks.

RhinoTech Screen Cleaning & Reclaiming

RhinoClean SW145
Screen Wash
TOP SELLER! A great solvent for degrading plastisol inks. Distilled from orange peels with a pleasant citrus scent and priced right.

RhinoClean PW115
Press Wash
An economical all purpose solvent mixture with a medium evaporation rate. Leaves no residue.

ER8500L
Emulsion Remover
Same as ER8550L only this one is concentrated. Dilute with water up to 15:1. One gallon makes 16 gallons of emulsion remover.

ER8550L
Emulsion Remover
Use straight from the jug to dissolve all types of liquid emulsion and capillary film. Use a trigger spray bottle to apply.

DG2200
Mesh Degreaser Liquid
Very effective and not expensive, this strong detergent removes any residue from mesh after reclaiming. Apply with trigger spray bottle. Can be diluted 4:1 with water.

RhinoClean SW175
Screen Wash
Great all-purpose solvent mixture. Removes most inks including mylar & epoxy. Perfect for ink recirculation systems. Moderate evaporation and minimum odor.

RhinoClean PW125
Press Wash
An aggressive press wash for plastisol, UV, and conventional solvent based inks. Dries fast and leaves no residue.

ER8500P
Emulsion Remover
This powder concentrate is sold by the pound. Mix it with water and one pound makes 32 gallons of emulsion remover.

RHINOTECH
THE SOLUTION IS IN THE SYSTEM
Call for Drum pricing on RhinoTech Products.

HR2400
Haze Remover
HR2400 removes tough ink stains and ghost images. Apply to mesh with trigger spray bottle, scrub then rinse.

Easiway Polypropylene Dip Tanks

Time Saving - Less Effort - New More Powerful Formula

The Easiway dip tank system is designed to save you time and money without the mess of traditional reclaiming methods, without hazards and without toxicity. Easiway dip tank chemicals are drain safe and can be used to clean hundreds of screens without being replenished. Unlike other dip tank systems; this system suspends and traps solids. You will not generate sludge in the tank if used properly.

EASIWAY SYSTEMS, INC.

Step 1. Clean excess ink from the screen with spatula or pallet knife. No need to clean ink residue.

Step 2. Place the screen in dip tank with Easistrip Supra solution. (1 part Supra to 5 parts water). Allow 1-2 minutes to soak.

Step 3. Pressure wash the screen from the print side. Ink and emulsion are gone.

Steps 4 & 5. Spray Easisolv 201 or 701 on screen and scrub with pad to remove any stains. Pressure wash to rinse.

Easiway Screen Cleaning & Reclaiming

EasiSolv Screen Perfect
Mesh Prep / Degreaser
Liquid treatment prepares mesh for emulsion coating & film application. Prevents common screen making problems.
(For use as Degreaser mix 1:20.)

EasiSolv 5
Stencil Remover Concentrate
A concentrated liquid solution that aggressively dissolves direct, direct/indirect emulsions and capillary film. Mixed 1:4. Economical · Biodegradable · Degreases, too!

EasiSolv 140 Solvent Cleaner
Solvent Cleaner
A fast acting, quick drying solvent to dissolve all types of printing inks. Ideal for on press color changes, opening screens and saved screens.
Non-flammable · Dries Fast

EasiSolv 201
Screen Wash
Quickly dissolves all types of screen printable inks, adhesives, and stains from mesh. Can be applied to a wet screen as a stain remover with no mesh damage. Dissolves Inks & Stains.
Use after EasiStrip Supra.

EasiSolv 500
Stencil Remover Concentrate
All purpose, low cost emulsion remover. Super concentrated liquid that dissolves all direct emulsions and capillary film. Removes the toughest work hardened and water-resistant emulsions. Degreases as it dissolves stencils. Mixes from 1:10 up to 1:50. Ships non-hazardous.

EasiSolv 701
Screen Wash & Stain Remover
Quickly dissolves all types of screen printable inks, adhesives and stains from mesh. Can be applied to a wet screen as a stain remover with no mesh damage. Dissolves Inks & Stains.

PlastiSolv 800
On Press Cleaner
An odor free textile ink remover. Cuts ink fast and quickly dries for on press color changes and screen opening. Will not lock in emulsion for easy screen reclaiming.

PlastiSolv 820
Screen & Press Wash
An odor free textile ink remover for use on press or in the reclaiming area. Great for on screen color changes and can be used with water as a screen wash.
Top Seller · Won't lock in emulsion.

PlastiSolv 842
Screen & Press Wash
An environmentally approved, 100% active, virtually odor free textile ink remover which can be effectively used at the press and in the reclaim area. Cuts ink fast and quickly dries for on press color changes, screen opening or saved screens.

EasiSolv 930
Screen Wash / Stain Remover
A low odor, fast penetrating screen wash and stain remover. Removes plastisol, UV, and water based inks without the odors associated with aggressive solvents and haze removers. Works quickly without damage to screen mesh.

AccuRIP Software

We're All About Accuracy

AccuRIP
THE DIFFERENCE IS BLACK & WHITE

www.softwareforinkjetprinters.com

AccuRIP allows you to print halftones with Epson Inkjet Printers. One copy of AccuRIP is all you need to print from ALL OF YOUR COMPUTERS. That's right, setup AccuRIP on one network and "share" the AccuRIP print driver. No need to load any software on the other computers, those users just choose AccuRIP as a network shared printer and print. Simple. This is a huge cost savings. One software, one price for all your computers. Unlimited network use.

FREE 14-DAY TRIAL

AccuRIP Universal

$495

AccuRIP Universal (MAC and Windows OS)

AccuRIP Universal works with Epson Inkjet Printers. Epson Models (Artisan 50 through the Stylus Pro 11880). Windows XP and higher, Macintosh 10.4.5 and higher. Universal Serial Number (works on either platform - one installation)

All Black Cartridge Sets for Epson Printers

The ALL Black Cartridge System loads 600% or more ink in the Epson Inkjets!

Screen printers only need black for film positives. The All Black System gives you black ink in much greater volume! It dramatically reduces time between cartridge replacement. Offers user flexibility, use all for maximum efficiency or one at a time. Greatly reduces or eliminates nozzle clogs. Allows the printer to perform as it was designed to, with cartridges, not dummy cartridges that stress the printer. Advanced software code allows the printer to focus multiple cartridges to a tight location for greater quality and accuracy on film positives. Insert each cartridge from the ALL Black Ink System into the appropriate slots (they are clearly marked). AccuRIP will instruct your Epson printer to lay down black ink from all inkjet heads.

FOR USE WITH AccuRIP ONLY

WATERPROOF FILM RECOMMENDED

Epson Printer	Cartridges/Set	Set	*Chip Resetter
1800	8	$195	$ 32
1900	8	195	32
4800	8	552	108
4880	8	532	108

*Recommended for use with all Black Cartridge sets.

Epson Printer	Cartridges/Set	Starter Kit	Tank Replacements
1400/1430	6	$150	$99

Starter sets include 6 frames, 6 tanks and a chip resetter. The tanks easily snap into the reusable frames. When in need of more ink simply order tank replacements, remove frames from printer, disassemble the tanks and frames, insert a tank into each frame, remove yellow sticker from each new tank, use chip resetter to reset the frames, insert tank into proper slot in printer. See instructions at: www.allblackcartridges.com

Kimoto Silkjet SC4
Inkjet Film

Lets your inkjet printer produce dark, dense positives economically. Designed for printers using dye based ink. 4 mil thickness. Coated on one side.

Cherokee Rubber White Pallet Sheeting

Protect your wooden and aluminum pallets with this synthetic polymer sheeting. Applies to existing pallets. Prevents heat buildup during long spot cures, helps prevent warping. 1/8" thick, 36" wide. *Use Sprayway #92 Hi-Temp Heavy Duty Adhesive to glue pallet sheeting to pallets.*

$38/FT

Numbering Systems

Numbering Stencils...as Easy as 1 2 3

This efficient numbering method allows you to direct print numbers on most fabrics without investing in expensive numbering equipment. These inexpensive stencils adhere to the screen on the printing stroke and are thrown away after printing the number. The next stencil is then adhered to the screen in the same fashion with no adjustment or clean up of the screen between numbers. Order in sets or by individual number and size. One Set includes 200 each #1. 100 each # 0, & 2 thru 9. 100 each Spacer (for two digit numbers)

WORKHORSE PRODUCTS

Manual Textile Printers

Odyssey Series Manual Rotary Textile Printer

Odyssey manual printers may be value-priced but they are built to the Workhorse standard with tubular steel construction and a 2" diameter center shaft with tapered roller bearings. No wimpy sheet metal and sheet metal screws on this machine. Standard equipment on each printer includes Micro-Registration, Adjustable Screen Angle and Adjustable Off-Contact. Modular construction allows for expanding the 4-Color/4 Station to either a 6/4 or 6/6. Standard pallet size is a generous 15" x 18".

Odyssey Series 'Table-Top' Manual Textile Printer

Odyssey quality in a compact design. Get model 1100 for simple one-color production runs. Great for a jacket hold-down or a vacuum pallet for printing flat stock. Get Model 4100 for 4-color capability. Each bench model uses the same high quality printhead as the floor model Odyssey printers.
Standard Pallet size is a generous 15" x 18".

FlashBack Flash Unit

WORKHORSE PRODUCTS

After the print stroke, Flashback slides its thin quartz element in between the garment and the screen. The printed image is instantly flash cured and then cooled. A heat reflector focuses the heat on the garment while protecting the screen. This is combined with built-in Turbo Air Fans to keep the screen and ink cool. There are 5 sizes of flashback available to fit all Workhorse machines, from Freedom to the Javelin.
(16" x 18", 20" x 22", 22" x 27", 24" x 36", 41" x 32")

Print-Flash-Cool All on one print head.

Wild Side North

Fundamentals of Garment Screen Printing Workshop

Wild Side North conducts regularly scheduled workshops at its' showroom location in Slippery Rock, PA. The popular workshop, "Fundamentals of Garment Screen Printing" teaches all the basics: plastisol inks, pre-press, press set-up, hands-on printing and screen reclaiming.

- **PLASTISOL INKS**: what they are and how they work; ink additives and modifiers; choosing the right ink for the right garment.

- **PRE-PRESS**: creating graphics; understanding screen frames, mesh, and emulsions. Includes screen coating and screen exposure.

- **PRESS SET UP**: registering multi-color jobs and off-contact printing. Fine tuning the printer to fit the job.

- **MULTI-COLOR PRINTING**: printing production is explained, students get to print on T-shirts, aprons, caps and nylon.

- **SCREEN RECLAIMING**: proper recycling of screens to insure trouble free re-imaging.

The one-day workshop is limited to 4 students, allowing lots of individual attention and "hands-on" learning. Past attendees have come from as far as Louisiana, Oregon, and Puerto Rico. Classes are held from 8:30am to 5pm. Tuition covers the cost of instruction and all materials. Call for registration form.

Workshop dates listed at www.wildsidenorth.com
